

Question Number	Correct Answer	Reporting Strand	Descriptor
1	B: 7	Number & Arithmetic	Count the number of objects in a diagram
2	Tomorrow it will be Thursday. - This will not happen. ; The date next Monday will be 13 June. - This will happen. ; Tomorrow it will be sunny. - This might happen.	Chance & Data	Use simple estimates of probability
3	C: 9	Algebra & Patterns	Determine the number of objects in the next shape of a pattern
4	B: 2	Space & Geometry	Identify the number of sides missing on a hexagon
5	39	Number & Arithmetic	Form a two-digit number according to a rule
6	A: triangle	Space & Geometry	Identify shapes in a drawing
7	B: 35	Number & Arithmetic	Determine the number represented by a position on a number line
8	skateboard = longest green box; basketball = tallest green box; watch = smallest box; shoes = box with green ribbon	Measures & Units	Compare objects based on size and shape
9	A: Tigers	Chance & Data	Interpret a simple picture graph
10	A: 11	Algebra & Patterns	Solve a simple number problem expressed in symbols
11	4, 6, 7	Number & Arithmetic	Find three numbers that have a given total
12	D: 12:30	Measures & Units	Identify the clock that shows a time that is half an hour fast
13	C: G	Number & Arithmetic	Solve a problem using a number line
14	14	Chance & Data	Count the tally marks in a table
15	C: 32	Number & Arithmetic	Solve a problem involving halves

16	book leaning to left on second shelf from top	Space & Geometry	Interpret and follow directions around a familiar location
17	B: stick showing 4 equal parts	Measures & Units	Identify an image showing half the length of an object
18	C: Jim	Algebra & Patterns	Count back from 20
19	A: 16	Measures & Units	Find the total number of equally spaced fence posts around a square paddock
20	D: 36	Number & Arithmetic	Solve a problem involving the expressions 'more than' and 'less than'
21	blue, yellow	Algebra & Patterns	Continue a pattern of objects
22	D: November	Chance & Data	Read a circular graph and compare data
23	C: 10	Number & Arithmetic	Determine the greatest number of coins that can be used to make a purchase
24	A: second square row 2 is yellow	Space & Geometry	Complete a symmetrical tile pattern
25	D: 6	Measures & Units	Compare the areas of rectangles
26	white square on the right in the second last row	Space & Geometry	Identify the position of a shape from a different perspective
27	A: 14	Number & Arithmetic	Solve a problem involving addition and subtraction
28	B: 6	Chance & Data	Count the number of possible arrangements of objects
29	B: 15	Algebra & Patterns	Determine the value of an unknown given three number sentences
30	7	Number & Arithmetic	Solve a problem involving the division of a collection of objects into equal-sized groups
